Numbers Template Business Expenses

If the document contains transactions during a period of more than a year, you'll need to turn to SUMIFS.. The Expenses-1 table has no formulas All data shown is entered directly Summary-1 has two formulas:Summary-1::C2:
IF(LEN(A2)<1,',SUMIF('Expenses-1'::B,A2,'Expenses-1'::C))Filled down to C10.. Hi Laura,Financial Records Mac Numbers
Template Keep personal finance records for three checking and savings accounts, an IRA, six credit cards, two cash accounts and medical expenses.. If your document lists transactions during a single year, you'll be able to get the totals you want using SUMIF.. Here's are two small examples illustrating each case In the simpler case above, where all transactions are in the same year, the formula is concerned only with totals for each category.
